Questions this raises — published data only, so these are questions, not conclusions

1. The achievement rate is 16.4 points above the all-provider rate in 2024/25. Since 2022/23 it has risen 3.8 points, against +10.6 for all providers. It is still above the sector, but the sector has improved faster. Which standards or cohorts have not kept pace?
2. Published rates are a year behind. Can the team see this year's position by standard, employer and caseload before it is published?

What a Review would add. The published figures show where results differ. Your own records show why: which learners, employers and points in the programme. A Review maps that in five working days and sets up a monthly view so you see it before it is published. The Reporting & Insight Review is £345, fixed price, no VAT, with a full refund if it doesn't give you at least three improvements you'd act on. Details at **zktheory.org/services**.
