FOR CHARITIES, COMMUNITY GROUPS AND ALTERNATIVE PROVISION

Need and reach analysis

The need in your area and the people you reach, side by side, in figures a funder will recognise.

Who it's for

- Charities and community groups writing a bid that asks for evidence of need
- Organisations planning outreach, or deciding where to run a new session or site
- Alternative provision providers showing commissioners which communities their placements serve

The question it answers

How great is the need where we work, is our service reaching the neighbourhoods and groups where it is greatest, and where are the gaps?

What you get

- A profile of need in your area from official sources: deprivation, income, child poverty, health and education, compared with county and national figures
- Your reach set against it: participants by neighbourhood and level of deprivation, compared with the local population
- The gaps: areas of high need where few people use your service, and groups that are under-represented
- A 3–4 page summary with maps, charts and plain-English commentary, plus the workbook so you can update it
- A short paragraph on local need, with its sources, that you can paste straight into an application

What I need from you

- The area you work in (towns, wards or local authority)
- Participant counts by neighbourhood, made on your own computer with a lookup workbook I provide
- Any age or other breakdowns you already record, as counts
- Which bid or plan this is for, and the deadline

How it works

- 20-minute call to agree the area and the comparisons
- You run the lookup workbook and send me the counts
- Summary and workbook delivered within 7 working days
- One round of changes included

Example finding

Six in ten participants came from the most deprived fifth of neighbourhoods in the county, against one in six residents. But one high-need estate two miles from the venue had almost no participants — the obvious focus for outreach in the next bid.

Illustrative example only, not a client result.

£500–£850 fixed price

Depends on the size of the area and the number of services or sites compared. Confirmed before work starts. Invoiced on booking, payable on delivery. No VAT is added.

Best time: Before a bid that asks for evidence of need, or when deciding where to offer a new service.

Your data. Postcodes never leave your organisation. The lookup workbook turns them into counts by neighbourhood on your own computer, and I receive only those counts. No names or personal details are needed.

Next step: email **stephen@zktheory.org** with a line about what you need and when it's due. I'll reply within two working days with whether I can help and a fixed price.
