**Questions this raises** — published data only, so these are questions, not conclusions

1. The achievement rate is 18.2 points above the all-provider rate in 2024/25. Since 2022/23 it has fallen 5.1 points, against +10.6 for all providers. It is still above the sector, but has dipped while the sector improved. Which standards or cohorts account for the dip?
2. Published rates are a year behind. Can the team see this year's position by standard, employer and caseload before it is published?

**What a Review would add.** The published figures show where results differ. Your own records show why: which learners, employers and points in the programme. A Review maps that in five working days and sets up a monthly view so you see it before it is published. The Reporting & Insight Review is £345, fixed price, no VAT, with a full refund if it doesn't give you at least three improvements you'd act on. Details at **zktheory.org/services**.
