Questions this raises — published data only, so these are questions, not conclusions

1. The achievement rate is 33.6 points below the all-provider rate in 2024/25. Since 2022/23 it has fallen 26.8 points, against +10.6 for all providers. Which part of the provision is holding the rate back?
2. Learners aged 24+ achieve at 31.1% against 65.4% across all providers. Is this concentrated in particular standards or employers?
3. Data Analyst (70 leavers) is 26.1 points below the national rate for the same standard. Where in that programme do learners leave: early withdrawal, breaks in learning, or at end-point assessment?
4. Published rates are a year behind. Can the team see this year's position by standard, employer and caseload before it is published?

What a Review would add. The published figures show where results differ. Your own records show why: which learners, employers and points in the programme. A Review maps that in five working days and sets up a monthly view so you see it before it is published. The Reporting & Insight Review is £345, fixed price, no VAT, with a full refund if it doesn't give you at least three improvements you'd act on. Details at **zktheory.org/services**.
