Questions this raises — published data only, so these are questions, not conclusions

1. The achievement rate is 4.1 points below the all-provider rate in 2024/25. Since 2022/23 it has risen 4.5 points, against +10.6 for all providers. The rate is rising, but more slowly than the sector, so the gap has widened. Which standards or cohorts have not kept pace?
2. Learners aged 24+ achieve at 32.4% against 65.4% across all providers. Is this concentrated in particular standards or employers?
3. Both of the largest standards are below their national rates, the widest gap being Outdoor Activity Instructor (130 leavers, 11.6 points). Is there a common cause, such as recruitment, employer engagement or end-point assessment readiness, or does each programme have its own?
4. Published rates are a year behind. Can the team see this year's position by standard, employer and caseload before it is published?

What a Review would add. The published figures show where results differ. Your own records show why: which learners, employers and points in the programme. A Review maps that in five working days and sets up a monthly view so you see it before it is published. The Reporting & Insight Review is £345, fixed price, no VAT, with a full refund if it doesn't give you at least three improvements you'd act on. Details at **zktheory.org/services**.
