Questions this raises — published data only, so these are questions, not conclusions

1. The achievement rate is 10.7 points above the all-provider rate in 2024/25. Since 2022/23 it has risen 13.8 points, against +10.6 for all providers. What is behind the improvement, and is it holding in this year's in-year figures?
2. Network Cable Installer (20 leavers) is 10.9 points below the national rate for the same standard. Where in that programme do learners leave: early withdrawal, breaks in learning, or at end-point assessment? With around 20 leavers, a single cohort can move this figure noticeably.
3. Published rates are a year behind. Can the team see this year's position by standard, employer and caseload before it is published?

What a Review would add. The published figures show where results differ. Your own records show why: which learners, employers and points in the programme. A Review maps that in five working days and sets up a monthly view so you see it before it is published. The Reporting & Insight Review is £345, fixed price, no VAT, with a full refund if it doesn't give you at least three improvements you'd act on. Details at **zktheory.org/services**.
