Questions this raises — published data only, so these are questions, not conclusions

1. The achievement rate is 11.1 points below the all-provider rate in 2024/25. Since 2022/23 it has fallen 6.5 points, against +10.6 for all providers. The latest year was up 11.9 points. Is that recovery holding in this year's in-year figures, and which standards are still behind?
2. Learners aged 24+ achieve at 44.1% against 65.4% across all providers. Is this concentrated in particular standards or employers?
3. All 7 of the largest standards are below their national rates, the widest gap being Teaching Assistant (20 leavers, 41.5 points). Is there a common cause, such as recruitment, employer engagement or end-point assessment readiness, or does each programme have its own? With around 20 leavers, a single cohort can move this figure noticeably.
4. Published rates are a year behind. Can the team see this year's position by standard, employer and caseload before it is published?

What a Review would add. The published figures show where results differ. Your own records show why: which learners, employers and points in the programme. A Review maps that in five working days and sets up a monthly view so you see it before it is published. The Reporting & Insight Review is £345, fixed price, no VAT, with a full refund if it doesn't give you at least three improvements you'd act on. Details at **zktheory.org/services**.
