Questions this raises — published data only, so these are questions, not conclusions

1. The achievement rate is 6.4 points above the all-provider rate in 2024/25. Since 2022/23 it has fallen 3.3 points, against +10.6 for all providers. It is still above the sector, but has dipped while the sector improved. Which standards or cohorts account for the dip?
2. Business Administrator (30 leavers) is 22.1 points below the national rate for the same standard, while Early Years Educator is 12.8 points above. The gap looks specific to particular programmes rather than provider-wide. Where in Business Administrator do learners leave? With around 30 leavers, a single cohort can move this figure noticeably.
3. Published rates are a year behind. Can the team see this year's position by standard, employer and caseload before it is published?

What a Review would add. The published figures show where results differ. Your own records show why: which learners, employers and points in the programme. A Review maps that in five working days and sets up a monthly view so you see it before it is published. The Reporting & Insight Review is £345, fixed price, no VAT, with a full refund if it doesn't give you at least three improvements you'd act on. Details at **zktheory.org/services**.
